

PROFESSIONAL ANTARES® CARD

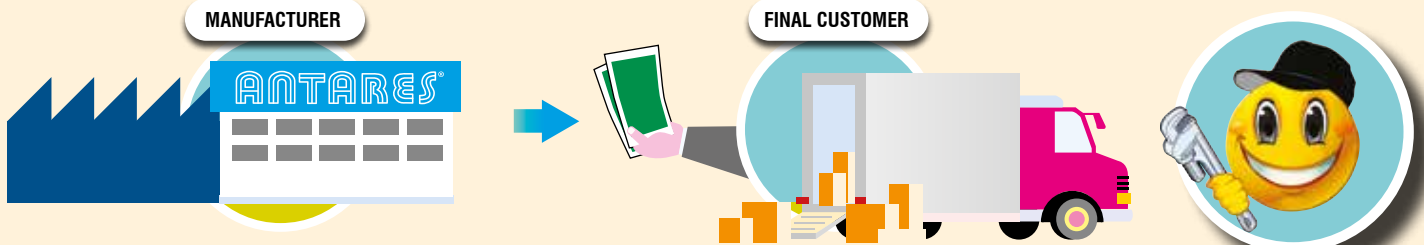

GIFTS CATALOGUE

TRADITIONAL SALE

ANTARES' sale is a direct sale without expensive go-betweens*.

**Except for some articles manufactured directly by the producers in spares.*

WHY BUY FROM ANTARES

**BEST PRICE
FROM THE MANUFACTURER TO THE
INSTALLER**

Most of the products herein enclosed are manufactured and assembled by the group ANTARES, from us to you without any expensive go-betweens.

SHOP QUICKLY AND SAFELY

Immediate check on availability of items - articles set aside as you order. Possibility of checking all the stages of your order.

VAST ASSORTMENT

Products of various types and models, to meet with your needs and requirements almost always ready to be shipped.

DELIVERY TO YOUR DOOR-STEP

No extra expenses or waste of time to have your goods with ANTARES delivery is safe, fast and at a fixed cost.

**RETURNS FREE AND EASY
SATISFIED OR YOUR MONEY BACK**

You're not satisfied? Return your goods free. If an article for any reason is not to your satisfaction, within 20 days you can have a substitution or refund.

HELP LINE

Our technical department is pleased to supply any extra information where available on our products.

2 YEARS WARRANTY

All products with the ANTARES brand are under a two year guarantee.

SAFEGUARDING PRICES

We care about the trade and your profession, ANTARES sell exclusively to registered members and professionals with Companies House.

SAFE SITE AND E-COMMERCE

Systems protected by top level security "VeriSign".

Find out the advantages of Antares Professional Card

1) What is Antares Professional Card

Antares Professional Card allows the “Holder” customer to join our Fidelity Programs, in particular all the discount campaigns promoted by:

ANTARES for Water & Fire Ltd
Mespil House, Sussex Road,
Dublin 4

2) Addressees

Our fidelity card is exclusively addressed to all the **ANTARES** for Water & Fire Ltd customers and to the exclusive members of the Trade registered with Companies House. The card is only virtual (no physical media) and it works by associating the subscription document number with the client code. The card enables the client to benefit from discounts on items purchased within a defined lapse of time. Discounts can be collected in accordance with the regulation defined below.

3) Release of the card

The release of the card is totally free. In order to get it **the customer must be an exclusive member of the trade registered with Companies House** and must fill the subscription form out. Shall this form be incomplete or incorrect, it will not be possible to release the card. The “holder” must also communicate possible changes of his/her personal data. The data will be treated according to the personal data protection legislation as specified in the provided information.

4) Card use

In order to benefit from all the advantages of the card, the customer must communicate his/her subscription to the program before purchasing. Once the customer has subscribed to the program, the collection of “Waterdrop” points will automatically be run by **ANTARES’** database system. You can check all the amount of collected “Waterdrop” points on every invoice.

5) The card is personal and exclusively refers to the company’s number registered with Companies House. It is not possible to give points to another company with a different registered number with Companies House.

6) Voluntary dissociation

The client is free to unsubscribe at any moment either by e-mail or fax. The dissociation implies the loss of every benefit collected so far.

7) Validity and suspension of the card

The card has no deadline but the issuer can suspend it at any given moment in case it has not been used for over 12 months or if the regulation has been violated. The suspension implies the cancellation of the card and all benefits collected so far. The issuer reserves the right to demand for possible benefits collected illicitly and to take legal actions against the holder.

ANTARES®

FREE WITH 133 POINTS

Digital tester for electrical measurements with probe and LCD display
Art. F.703.00

FREE WITH 133 POINTS
120 POINTS + € 1.33*

Tester with a four-digit display, can measure DC/AC voltage, DC/AC current, resistance, frequency, temperature, diodes and h FE transistors. Ideal for maintenance.

Technical features

- Operating range:
- DC 200 mV / 250 V
- AC 200 V / 250 V
- DC 2000 µA/10 A.
- Resistance 200 Ω / 20 MΩ
- Temperature: -40°C - 1000°C
- Diode test - Audible signal -
- Complete with protection fuses.

Pipe cutter

Art. F.620.35

FREE WITH 157 POINTS
135 POINTS + € 2.17*

Tube Cutter with Cutting Wheel for Copper, PVC, Aluminum, Polyethylene, and Steel Pipes – Cutting Capacity 3–35 mm.

Technical features

For diameters 4 from to 28 mm.

FREE WITH 157 POINTS

Digital apparatus for measuring degrees of humidity

Art. F.790.00

FREE WITH 162 POINTS

125 POINTS + € 3.71*

Digital equipment with large LCD display for measuring the degree of humidity of biomass for combustion (wood, chips and pellets) and in the process of transformation of pellet masses before combustion.

Technical features

Measuring scale: 6-40% Equipped with 4 stainless steel ferrules for contact measurement, with memory of previous reading. Alkaline Battery run.

FREE WITH 162 POINTS

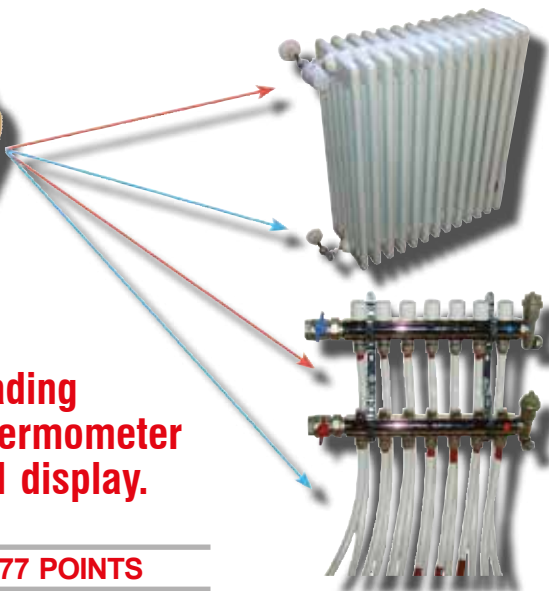

Distant reading infrared thermometer with digital display.

Art. F.704.00

FREE WITH 177 POINTS

140 POINTS + € 3.72*

FREE WITH 177 POINTS

Safely measures surface temperature or objects that are difficult to reach without contact. Indispensable tool for your profession, designed to measure, to calibrate the optimal circulation of a circuit (heating body, floor radiant circuit, etc.) measuring the return temperature for a appropriate Δt (10°-15°C.) or to measure the temperature of hot water production from a boiler

Technical features

Temperature range: -42°C to 550°C

Response time: 800 mSec

Battery power: 9V

Battery life: 16 h.

Weight: 138 gr.

Size: 152 x 130 x 38 mm.

FREE
WITH
182
POINTS

Digital manometer for rapid pressure control of expansion tanks

Art. F.726.50

FREE WITH 182 POINTS

155 POINTS + € 2.64*

Digital manometer for rapid pressure control of expansion tanks. Power supply: Permanent Lithium battery - Automatic ON/OFF - BEEP signal to confirm pressure reading.

Technical features

Range: 0-10 bar

Resolution: 0,05 bar

FREE
WITH
210
POINTS

Portable gas detector

Art. F.701.00

For methane, propane and carbon monoxide.

Highly sensitive - automatic shut-off after 5 mins.

FREE WITH 210 POINTS

165 POINTS + € 4.50*

Technical features

Battery powered : 2 x 1.5v AA

Weight : 60gr

Dimensions : 260 mm

Hot air gun

Art. F.852.20

Ergonomic design

Suitable for multiple uses such as:

- Removing plumbing sealant
- Defrosting of frozen pipes and fittings
- Application of heat shrink for joining electrical cables

FREE WITH 254 POINTS

200 POINTS + € 5,43*

Technical features

Power : 1800W

2 Speed: 200l/min and 500l/min

Adjustable temperature up to 600°C

FREE
WITH
254
POINTS

FREE
WITH
163
POINTS

Portable air compressor with digital display for recharging expansion tanks

Art. F.718.20

FREE WITH 163 POINTS

150 POINTS + € 1,30*

It allows you to pre-set the desired pressure using the buttons and the digital display, automatic shutdown after reaching the set pressure. Complete with high pressure hose for connection to the tank and quick-connect inflation plug. Recharge with cable with USB socket included, which allows charging in the car or with 5.5 mm 9Vdc universal jack socket.

Technical features

Capacity: 25lt/min.
Weight: only 0.6 kg

FREE
WITH
610
POINTS

Universal thermocouple tester for gas boilers

Art. F.760.00

FREE WITH 610 POINTS

500 POINTS + € 11.08*

This device allows the controlling of the performance and condition of all types of thermocouples for boilers and gas cookers. It works without external current supply and is suitable also for intercepted thermocouples. Complete with milled adaptor for different threading and alligator clips to allow for the testing of all types of thermocouples.

FREE
WITH
521
POINTS

Insertion flange for circulator body for the connection to the scale removal pump for the cleaning of systems

Art. F.445.00

FREE WITH 521 POINTS

455 POINTS + € 6.62*

Complete with flexible hoses, screws and washers. Suitable for circulators with hole distance 68-69 mm: Grundfos, WSC, Wilo, Salmson, Myson, Antares, Circulating pumps.

FREE
WITH
616
POINTS

Pipe cutter for multilayer pipes and polyethylene pipes up to 35 mm.

Art. F.625.35

FREE WITH 616 POINTS

550 POINTS + € 6.60*

Pipe cutter with robust aluminum construction. The conical blade shape enables single-hand operation. Effortless working through power transmitting ratchet feed.

Right angle cut thanks to the blade (guided on both sides). No chips remaining in the pipe.

FREE
WITH
667
POINTS

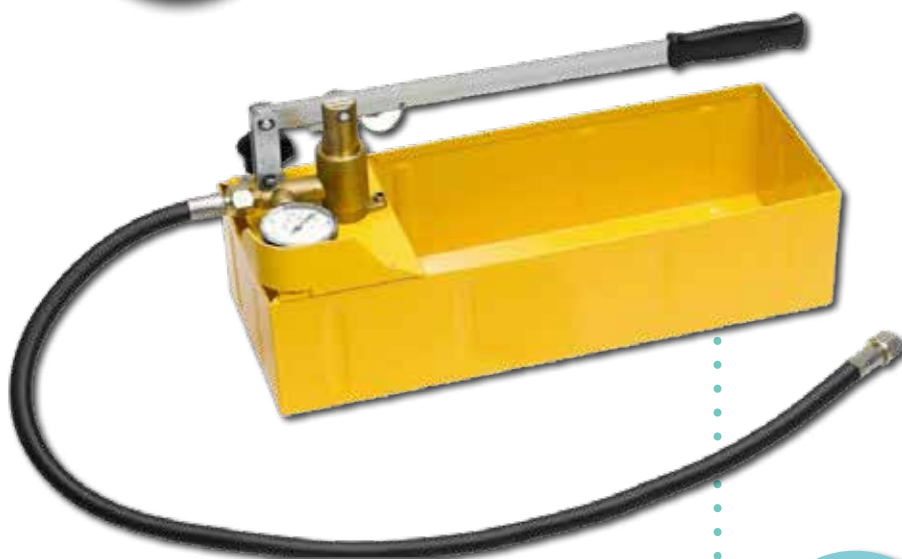

Electronic device for instant pH test

Art. F.744.00

FREE WITH 667 POINTS

515 POINTS + € 15.14*

Electronic device for instant pH test, with digital display. Battery run. With automatic evaluation, stability indicator, indicator for battery power and auto switch-off.

Complete tank capacity 12 lt
Up to 50 bar.

FREE
WITH
820
POINTS

Manual testing pump for systems with manometer

Art. F.741.00

FREE WITH 820 POINTS

625 POINTS + € 19.50*

Manual testing pump for systems with manometer 0-60 bar for testing the Tightness proof of the pipelines up to 50 bar and for the introduction of liquids (antifreeze) in the systems.

Technical features

Complete with 12lt capacity tank and 1,4 m high pressure hose with 1/2" connection.

FREE WITH 858 POINTS

Shockproof plastic case containing 2 digital manometers for pressure control

Art. F.723.02

FREE WITH 858 POINTS

815 POINTS + € 4.21*

Shockproof plastic case containing instruments listed below for checking Inflation and maintenance of expansion vessels and for pressure of liquids of various nature.

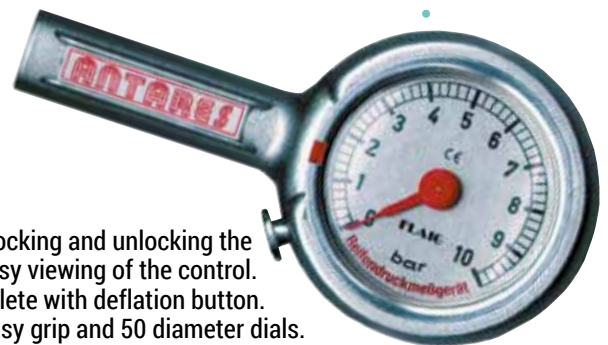

Containing:

- (Art. F.726.50) Digital manometer for pressure control of expansion vessels. Range 0 - 10 bar.
- (Art F.722.04) Controlable manometer with pressure reading block. Range 0 - 4 bar. Fitting for tap connection size 1/4".F

Digital manometer for rapid pressure control of expansion tanks.
Power supply: Permanent Lithium battery
Automatic ON/OFF - BEEP signal to confirm pressure reading.

Technical features
Range: 0-10 bar
Resolution: 0,05 bar

Pressure controller manometer with button for locking and unlocking the pointer on the value obtained for easy viewing of the control. Complete with deflation button.
Scale 0 - 4 bar. With easy grip and 50 diameter dials.

Technical characteristics
Scale: 0 - 4 bar
Complete with connection for the 1/4" M quick and fixed measurement handle

FREE
WITH
1000
POINTS

Electronic conductivity meter with digital display

Art. F.743.00

FREE WITH 1000 POINTS

840 POINTS + € 16.00*

Equipped with kit for evaluating the precision throughout time. The water hardness value can be obtained from the conductivity value.

Technical features

Battery run. Precision to: 20°C +/- 20%. F.S.
Dimensions: 175 x 41 x 23 mm.

FREE
WITH
1038
POINTS

Pipe dispenser

Art. G.840.00

FREE WITH 1038 POINTS

970 POINTS + € 6.74*

Clip fixer "Tacker" tool

Art. G.835.00

FREE WITH 1052 POINTS

940 POINTS + € 11.16*

For the automatic insertion of pipe fixing clips Art. G.836 and G.828.20 onto insulation panels for underfloor heating and cooling systems.

Pipe fixing clip Art. G.836

FREE WITH 1052 POINTS

Pump for inserting glycol into systems

Art. F.740.00

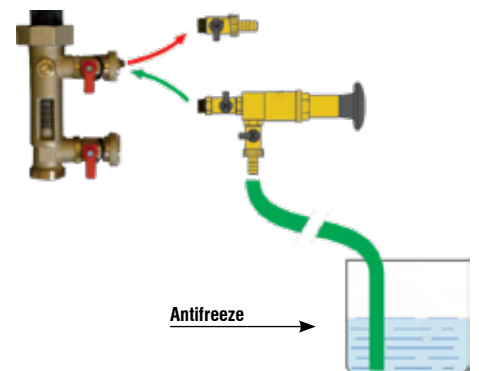

FREE WITH 1194 POINTS

1005 POINTS + € 18.94*

FREE WITH 1194 POINTS

APPLIANCES

Manual injection loading pump of anti-freeze liquid for pre-assembled modules E.651 E.654 E.662 and other types. Complete of ball check valve for increase of pressure and insertion of liquid into system. Conn. 1/2" M and rubber hose conn.15 mm.

Technical features

Capacity 2 lt/m

Max pressure drive: 4.5 bar.

FREE
WITH
1450
POINTS

Portable gas detector

Art. F.700.00

FREE WITH 1450 POINTS

1000 POINTS + € 44,93*

Portable gas detector with display and leather-look case.

Professional equipment for revealing gas leaks. When presence of explosive gas is detected, apart from emitting an audible signal it allows you to read the amount of concentration of gas in the environment.

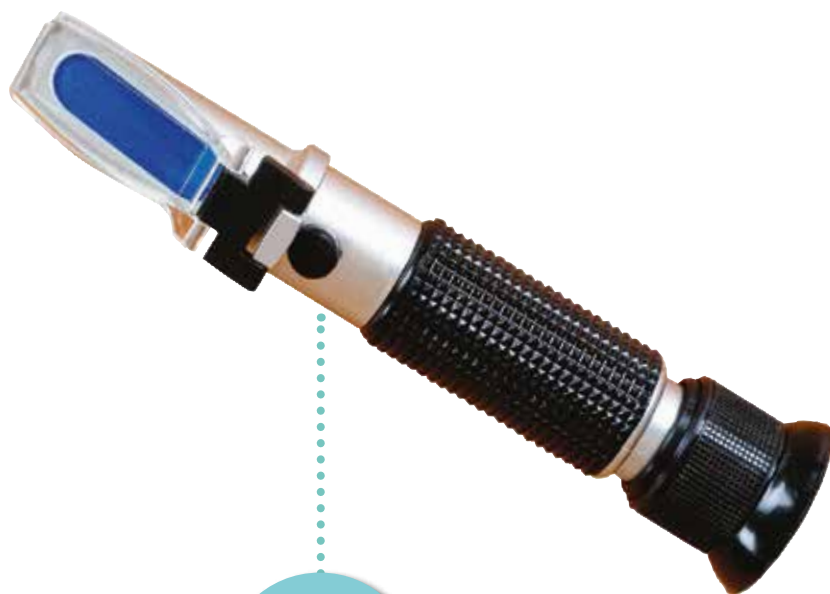

Technical features

Precision up to 1% Runs on lithium polymer rechargeable batteries with auto switch off. Battery autonomy 12 hours non stop.

Conforms EMC EN5070.

Dimensions 140 x 60 x 27 .

Weight 200 gr.

FREE
WITH
1427
POINTS

Device for checking and displaying the density of ethylene glycol (antifreeze) in systems

Art. F.747.00

FREE WITH 1427 POINTS

1100 POINTS + € 32.71*

Device for checking and displaying the density of ethylene glycol (antifreeze) in the watery solution of the system with accurate analogic meter.

FREE
WITH
1440
POINTS

REMS Pull-Push Suction and Cleaning Appliance for Easily Clearing Blockages with Short Sleeve for Sink and long for toilet.

Art. G.947.00

FREE WITH 1440 POINTS

1255 POINTS + € 18.44*

FREE
WITH
1650
POINTS

Differential digital micromanometer with plastic slipcase

Art. F.702.01

FREE WITH 1650 POINTS

1170 POINTS + € 47.98*

A liquid crystal display for professional use, easy to handle, small dimensions: 67 x 135 x 35 mm for measuring static and differential pressure specially indicated for:

- Gas Pressure
- Pressure loss in pipes/tubes
- Pressure in Combustion Chambers
- Differential pressure check
- Chimney flue efficiency

Technical features

Capable of two scale measures:
± 200 mm H₂O. ± 1.000 mm H₂O

Battery feed 3 X AAA

Battery life 100h with auto switch-off

Equipped with one silicone tube

(4 x 9 x 600 mm) and a mettalic one (4 x 6 x 160 mm) 100 mbar.

Descaling pump "INCLEAN"

Art. F.440.10

FREE WITH 2991 POINTS

2740 POINTS + € 25.10*

"INCLEAN" descaler pump "INCLEAN" descaler pump entirely in plastic material permanently inserted on a suitable 18lt tank with a special anti-corrosion cover. The lid also contains pipes and cables making the compact pump easy to handle and easily transportable. Suitable for descaling coils in boilers and heat exchangers. It is equipped with a flow reverser which allows to attack the limestone in both directions

Technical features

Motor 230 Vac - Kw 0.165 - Protection IP55. Flow l/h 1.800. Head max 1 bar. Weight Kg. 7. Dimensions: h 50 x Ø36. Complete with connecting flexible hoses, fittings and shoulder strap.

Kit for pressure test on systems TESTO 510i Operation using Smartphone with Bluetooth mod. 240000 0131

Art. F.786.51

FREE WITH 3248 POINTS

2775 POINTS + € 47.27*

Suitable for pressure test on gas systems in accordance with UNI 7129 and preliminary test UNI 11137.

Kit includes:

- Bluetooth manometer testo 510i,
- kit pipes and pum
- case

(Smartphone not included)

DRAUGHT GAUGE TESTO

Type cod. 0638

0330 + 24RV00049

Art. F.785.33

FREE WITH 4080 POINTS

3015 POINTS + € 106.50*

The new testo probe conforms to UNI 10845 and guarantees stable and reliable measurements. Measuring range is up to 100 hPa, thus the network pressure can also be measured. Furthermore the network pressure (like any other differential pressure) can be constantly monitored thanks to the data logger function, which is integrated in the testo analyzer 330 and is provided with the graphical display.

Thanks to a continuous calibration system, the differential pressure probe performs a zero reset versus the atmospheric pressure every second. In this way it is possible to record a stable value and avoid measurement errors due to instrument/pipe movements or temperature differences.

Technical features

Resolution 0,01 Pa

Accuracy 3% of the measured value

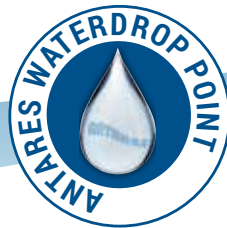

Measuring range up to 10.000 Pa

Probe can be used anywhere since it is equipped with a hook and a magnet.

FREE
WITH
4080
POINTS

Analyzer testo 330 turns into a high-precision draught gauge for draft measurement (UNI 10845).

Diamond disc grooving and cutting-off machine with speed regulation. for grooving and cutting e.g. concrete reinforced concrete or walls of all kinds natural stone plaster of all kinds. Depth of cut 61mm. Cutting width 62 mm adjustable to 3.6.10.20 mm using special spacer discs. With motor shaft diam. 22.2 for 1.2 or 3 diamond discs according to EN 13236 diam. 180 mm with maintenance-free gearbox, universal motor 230V 50-60 Hz 2000 W Multifunctional electronics with soft start automatic limiting of the no-load speed overload protection against overheating and restarting in the event of a grid blackout. Power cord 5.7m Load speed 5,000min. Suction nozzle for connecting a vacuum cleaner / dust collector (e.g. REMS pull M) SW 13 key In sturdy metal box

Electro-hydraulic radial press REMS Power Press + STEEL CASE

Art. G.935.00

FREE WITH 15945 POINTS

12420 POINTS + € 352.35*

Universal, handy electric tool with switch-off signal for producing pipe pressing joints for all common pressfitting systems.
REMS Power-Press – universal up to Ø 110 mm.
Secure crimping in seconds.
Automatic locking of pressing tongs.

FREE WITH 15945 POINTS

Radial Press with steel case
REMS Power-Press 577011
Electrical: 230 V
With 3 pressing tongs
For tubes diameters 16, 20, 26

Included in supply REMS Power Press Basic Pack.

Electric radial press with shut-off signal for making joints diam. 10-108 (110) mm diam. 3/8" -4". Self-locking pliers housing Electro-hydraulic drive with universal motor 230V 50-60Hz 450W maintenance-free gear with safety slip clutch and trapeze-shaped feed system with safety pressure switch. In sturdy metal case

Pressing procedure with impulse control

For operational safety and reliability. With complete closing of the tongs. An acoustic signal indicates the complete closing of the pressing tongs. The pressing tong remains closed as long as the return / release button is pressed. The visual inspection of the pressing according to regulations (pressing tongs fully closed) is therefore perfectly possible.

Drive

Enormous pushing and pressing force for extremely fast and perfect pressing. Powerful electro-hydraulic drive with 450 W universal motor robust planetary gear eccentric piston pump and compact high-performance hydraulic system. Safety pressure switch.

Manufacture

Robust compact suitable for use on site. Small size, slim shape. Can be used anywhere freehand over the head in tight corners. Ergonomic receiver with concave handle. Secure seating of the pressing tongs/ intermediate tongs due to automatic clamping.

Universal, handy electric tool with shut-off signal for making press joints of all common pressfitting systems. for battery or mains operation. Press fittings diam 10-108mm diam 3/4"-4"

Battery or mains powered. large amperage lithium-ion battery for long life. Powerful and lightweight. Over discharge and overcharge protection. Temperature control during charging. Operating temperature between 10 - 60°C Fast battery charge for short charging times.

C Included in supply REMS Akku Press Basic - Pack.

Cordless radial press for use with REMS pressing tongs / pressing rings as well as pressing tongs and pressing loops from other brands. Housing of clamps with automatic fixing. Electro-hydraulic drive with powerful 14.4 V 380 W battery motor robust planetary gear eccentric piston pump and compact high-performance hydraulic system. Safety pressure switch. Integrated LED light Battery 14.4 V fast battery charger 230V 50-60 Hz 65W In sturdy metal case

Pressing procedure with impulse control

For work safety and reliability. An acoustic signal indicates that the pressing tongs are completely closed. The pressing tong remains closed as long as the return/release button is pressed. The visual inspection of the pressing is regulated (pressing tongs fully closed) and therefore perfectly possible

Mechanism

Enormous pushing and pressing force for extremely fast and perfect pressing. Powerful electro-hydraulic drive with powerful battery motor 14.4V output 380W robust planetary gear, eccentric piston pump and compact high performance hydraulic system. Safety pressure switch

Manufacture

Compact easy to handle robust compact suitable for use on site. Small size, slim shape. Can be used anywhere freehand over the head in tight corners. Optimal weight distribution for one-handed use. Ergonomic casing with concave handle. Integrated LED light to illuminate the work Adjustable collet housing automatic clamping

Handy, universal electric tool with automatic return for making press joints for all common pressfitting systems. For battery or mains operation. Pressure joints: diam 10-40mm diam 3/8" - 1 1/4" universal up to diam 40mm Very light, very small, easy to handle. Fast and safe pressing automatic return after complete execution of pressing. Automatic clamping of the pressing tongs.

- Instruction manual.

Product description

The combustion analyzer Testo 320 with Bluetooth is the ideal tool for the regulation and certification of thermal systems. It is equipped with guided procedures and a high-resolution color graphical display.

Testo 320 can store up to 500 measurements and the "Easyheat" software allows you to manage the systems and measurements. The item is suitable for the external probe fine draft UNI 10845.

The flue gas analyzer and the cells for O₂ e CO have a 3 year warranty.

"ANTARES PROFESSIONAL CARD" regulations for the subscribers to the Gifts/Discounts Program and the "Waterdrop" points collection.

Here by subscribe to your Gifts/Discounts Program and declare that I have read the "Professional Card" regulations

1) Addressees

The "Waterdrop" points collection is totally free and exclusively addressed to the "Professional Card" owners. The card is released by **ANTARES for Water & Fire Ltd** - 125 Canterbury Road Westgate-On-Sea Kent CT8 8NL

2) Program procedure

2.1) Points collection

The points collection allows the subscribed companies to collect points (after purchasing by **ANTARES for Water & Fire Ltd**) and to benefit from a gift/discount once it has reached a certain amount.

2.2) Collection and value of points

In order to collect points, you have to purchase at **ANTARES for Water & Fire Ltd** and communicate that you have joined the "Professional Card" program, before purchasing. **Every purchase of 42.72 €** will allow you to collect 10 "Waterdrop" points on your card (equal to 0.85 €) which means a 2% discount on the purchased goods. This amount will be automatically summed to the total amount of points already collected in the previous purchases. The promoter can also decide to disburse additional points in relation to commercial campaigns on specific items indicated on the website or through other procedures (communicated from time to time by **ANTARES for Water & Fire Ltd**).

2.3) Points Use

Once a certain amount of points has been collected, the card owner has the right to receive - for free or by paying a determined fee, the articles in the "Gifts Catalogue" (constantly updated on the website: www.antaresent.com).

The amount of points used for getting the gift will be deducted from the total amount on the card.

2.4) Examples

Case: Gift request through "Waterdrop" points use

"Waterdrop points" availability = 2.700

Invoice n° --	Date --/-- /--			
Order code	Description	Quantity	Unit amount €	Amount per quantity
	Gift (Description)	1	230	230 +
	Waterdrop points	2.700	0.1 -	230 -
	Total taxable			00
	VAT 20% €			00
			Tota Invoice €	00.0

To be paid: 0€

Residual points: 400

Case: Gift request with contribution difference

"Waterdrop points" availability = 2.100

Invoice n° --	Date --/-- /--			
Order code	Description	Quantity	Unit amount €	Amount per quantity
	Gift (Description)	1	230	230 +
	Waterdrop points	2.100	0.1 -	210 -
	Total taxable			20 +
	VAT 20% €			4.4+
			Tota Invoice €	2.4 +

To be paid: 24.4 €

Residual points: 0

3) Program duration

Points collection lasts an annual cycle: it begins on 1 August of every year and it ends 31 July of the following year. The collected points must be used within the end of every annual cycle (by 31 July). After that date, all the collected points on the card will be cancelled and will therefore lose their validity.

The access to the Points collection implies the acceptance of the terms of this regulation, constantly updated at **ANTARES for Water & Fire Ltd**.

4) Use and usability of the collected "Waterdrop" points

The collected "Waterdrop" points can only be used within the program duration. Points are valid only if at least two purchases been made within a lapse of time not inferior to 30 days.

5) Gifts delivery and Use of "Waterdrop" points

The gifts described at Point 4 must be ordered at **ANTARES for Water & Fire Ltd** by specifying the item code, the amount of "Waterdrop" points necessary for the payment and the possible cash contribution. After the delivery, the amount of "Waterdrop" points will be deducted from the total points amount on the "Professional card". The remaining amount of "Waterdrop" points must be used within the program's cycle life deadline. After that date, the collected points will be cancelled and will therefore lose their validity. In case the gift is not immediately available in the warehouse, **ANTARES for Water & Fire Ltd** reserves the right to effect deferred delivery, depending on the supplier's availability.

6) Promotional items

It is not possible to collect "Waterdrop" points by purchasing temporary promotional items. You can find all these temporary discounted items on the "Temporary promotions" page on www.antaresent.com.

7) Points reversal due to returned items

Shall an item be returned, collected points will be deducted from the total amount on the "Professional card" at the moment of purchasing the returned item.

8) Points reversal due to payment insolvencies

In case of payment insolvencies, **ANTARES for Water & Fire Ltd** has the right to reset the collected points through the "Professional Card" convention.
